## Base Grids

### Product Features:

Base Grids help keep buildings clean—they reduce tracking of dirt, mud and other soilage—cut maintenance time and expense. Ideal for heavy foot traffic areas, Base Grids feature aluminum I-beam construction with a gridlock bar that keeps beams in place. A cushion at the base of the I-beam reduces traffic noise and provides a firm yet resilient footing. Aluminum frame is also available for recessed applications.

Inserts available in standard carpet, absorb carpet, poly-brush, vinyl, vinyl abrasive and serrated metal. Insert types may be specified in alternating rows. See page 7 under color selections for types, colors and details.

### Where should I use Base grids?

- Surface and recessed applications
- Best for use in heavy traffic areas
- Ideal for entryway, vestibules, and foyers
